

Modifications of Assessment Report for Trucks and Trailers

We thank you very much for your participation to THI Auctions.

We would like to inform you that we are now planning to modify our assessment reports for trucks and trailers from our auctions scheduled on October 3rd, 2011.

Modifications

- Classification of Assessment from current scale of 5 to scale of 3 or 2 (Excluding some points)
- Revision of Assessment Points
- Introduction of Illustration
- Introduction of Assessment Report for Trailers

The greatest modification this time is introduction of illustration, and points and methods of assessment will not be changed so largely. We believe that the new illustration will help our customers understand the total condition of vehicles easily at a glance. (Refer to the “Example of Illustration”)

We appreciate for your kind understanding and continuous support.
